DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 3-5, drawn to a method of correcting retinal detachments, classified in class 128, subclass 898.
- II. Claim 6, drawn to a heat shrink band with a custom designed buckle, classified in class 606, subclass 151.

It is unclear if claim 1 (and all claims dependent therefrom) is drawn to a method or an apparatus. If claim 1 is amended to make it clear that it is an apparatus claim, it will be considered to be in Group II. If Claim 1 is amended to make it clear that it is a method claim, it will be considered to be in Group I.

The inventions are distinct, each from the other because of the following reasons:

Inventions **Group I and II** are related as apparatus for its practice and process. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as

Art Unit: 3731

claimed can be used to practice another and materially different process other than retinal detachment, such as encircling or gripping an artery, vein, or finger.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

No matter which invention is elected, the following will apply.

This application contains claims directed to the following patentably

distinct species:

- I. The species of figure 2
- II. The species of figure 4
- III. The species of figure 5
- IV. The species of figure 6
- V. The species of figure 7
- VI. The species of a flat top hemi-cylindrical buckle (C10)

Applicant is also required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **claims 1 and 2** are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Art Unit: 3731

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Since this application is being prosecuted by the applicant pro se, no solicitation of an oral election was made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence

Art Unit: 3731

or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
